

# Streamline operations and make workflows more efficient

With the Aconex and Dropbox integration, you can reduce double-data handling, drive accountability, and access reporting and insights across all project data and processes from one single source of truth. Dropbox files can be shared, distributed, updated, tracked, and searched in controlled workflows across many different organizations connected on projects in Aconex.

Securely move documents, drawings, photos, and other files from Dropbox to Aconex with a few simple clicks

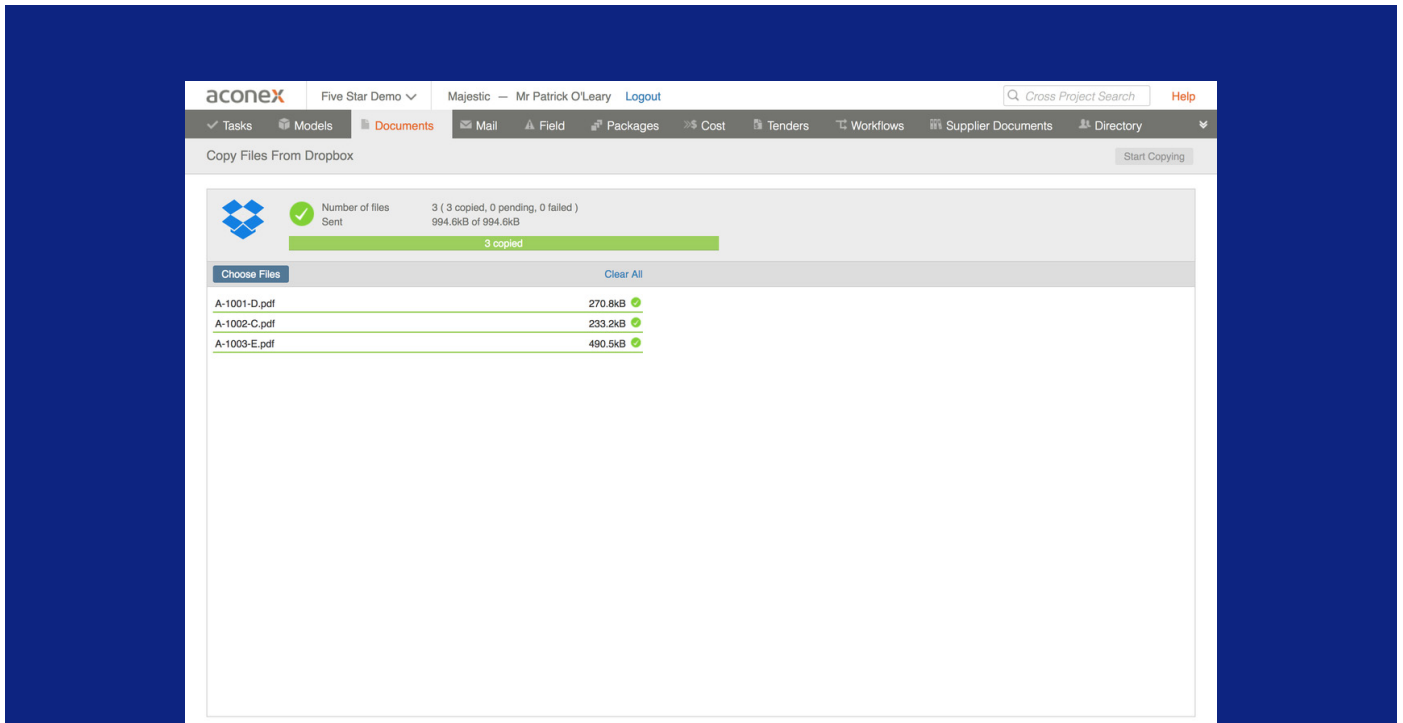

Easily upload project information from Dropbox into Aconex for a single complete record and audit trail

Manage draft versions of drawings on Dropbox before distributing the final versions to the construction teams via Aconex

**“We’re excited to partner with Dropbox to help teams better coordinate on large projects by leveraging data across platforms. Our goal is to continue driving accountability and insights to teams, with a growing ecosystem of integrations that helps our users build even more amazing things.”**

**Tim Olshansky**  
Chief Technology Officer of Aconex

 **Dropbox**

Dropbox Business is a central hub that enables project managers and general contractors to coordinate their teams and job sites to reduce overhead

- Simplify project management and remove silos. Bring together work from internal teams, contractors, architects and clients in one place, and easily search and manage files from construction sites.
- Minimize delays. Dropbox syncs 4 times faster than competitors. Get instant access to renderings, blueprints and videos without VPN or taking up space on your device.
- Work productively. Collaborate on any file type, from large CAD or BIM files to Excel spreadsheets with advanced previews—whether you’re at the office or on-site on a mobile device.
- Securely control and manage your jobs with extensive security and administration features that scale with your team

**aconex**

Aconex is the most trusted platform for digital project delivery on construction and engineering projects. Aconex connects owners, contractors and their project teams in the construction, infrastructure, and energy and resources sectors.

- Unify processes, project-wide with consistent, connected communication and workflows with full visibility, accountability, and a complete audit trail of every action and decision
- Securely connect all project participants from any device, on one easy-to-use system—in the office or field
- Control across your entire portfolio, with company-wide standards, a configurable platform, pre-defined project templates, and unlimited support
- Provide project-wide visibility and control between different organizations collaborating across projects
