

# Secure, seamless access to Dropbox Business with Microsoft Azure Active Directory

Quickly set up single-sign on (SSO) and manage account access automatically with Dropbox and Microsoft Azure AD to empower distributed teams to easily access Dropbox Business from wherever they are working.

## Secure application access

Set Conditional Access policies based on the user, device, location and more to determine whether access to Dropbox Business should be allowed, limited or blocked.

## Simplify account management

Connect Dropbox Business to Azure AD easily with a simple, step-by-step user interface.

## Streamline account provisioning

Create and manage user accounts automatically in Dropbox Business based on custom user groups or when users join, leave or move within your organization.

## Immediate scalable access

Reduce sign-in friction into Dropbox Business with Azure AD single sign-on.
