

Enhance data security and management with Dropbox

Efficiently and securely manage your Dropbox Business deployment with expanded security capabilities through the Advanced Team & Content Controls add-on.

Strengthen data protection

Get alerted when sensitive content on Dropbox Business is uploaded, shared, or made discoverable. Respond to threats faster by enforcing granular policies when data vulnerabilities occur, such as removing all collaborators or transferring document ownership.

Gain visibility and auditability

View global file grids for enhanced audit, discovery, and administration of all Dropbox Business activity from a centralized dashboard. Manage company risk by monitoring Dropbox settings and controls to ensure data security.
