Get full control of Dropbox with BetterCloud

Unify, simplify and control the management, and security of Dropbox with BetterCloud. BetterCloud ingests and centralizes Dropbox users, groups, files, and alerts, surfaces critical insights, and leverages insights to trigger actions and automate comprehensive workflows.

B E N E F I T S
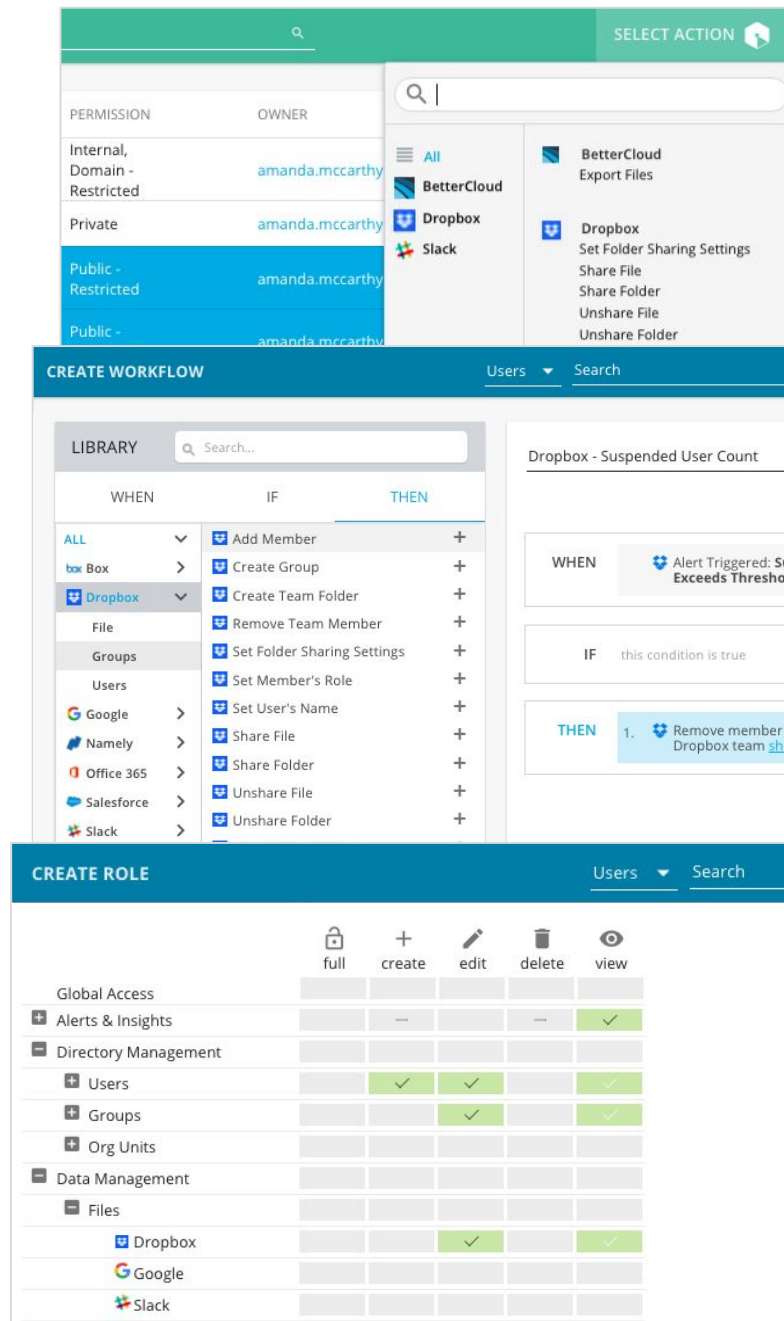

Gain Visibility

View and manage all of your Dropbox users, admins, groups, and documents from a centralized org-wide dashboard. With a consolidated list of controls, IT and Help Desk teams can quickly create new users, add/remove users in bulk from groups, or update documents' sharing permissions.

Automated Policy Enforcement

Get proactively alerted about files & folders with public sharing links, changes in team administrators, new user-managed groups, and more. Clickable alert strings give full context on the user, group, or file that triggered the alert and, with BetterCloud's policy engine, IT teams can build policies to automatically remove public sharing links or revert team setting changes.

Ensure Least Privilege Model

Role-Based Privileges gives IT the power to control Dropbox admin functions. Grant granular management and access rights to specific objects, data types, and management tools within BetterCloud, enabling Team Admins to continue responding to basic requests, such as managing Dropbox licenses or Team folders, without giving them too much control. All admin activity is monitored through BetterCloud's Audit Logs.

Get Support Whenever and Wherever You Need It

Whether you need support for a specific feature or want guidance on best practices, help is only a click away. BetterCloud provides a full range of resources for our customers, including a dedicated Customer Success Manager, one-on-one and group trainings, live technical support, an in-app help center, and a community of thousands of IT professionals to share best practices and tips.

Unlock Value with Multiple Applications

Managing SaaS applications through multiple admin consoles and custom scripts ultimately leads to silos, broken processes, and security threats. Our customers report improved security, transparency, and efficiency when they centralize the management of additional applications with BetterCloud. Each additional application results in unparalleled cross-application insights, enhanced context, and greater productivity through comprehensive automation workflows.

A Platform You Can Trust

We take security very seriously both internally and for our platform. We have a continued commitment to data security and privacy and we undergo SOC II, TRUSTe, and Privacy Shield Framework examinations annually. BetterCloud is completely built on Google Cloud Platform, ensuring our infrastructure is completely secure and built to scale.

AICPA SOC 2 — TRUSTe Certified Privacy — Privacy Shield Framework
