

Save instructors and learners time and effort while maximizing your institution's technology investments

Blackboard Learn™'s seamless integration with Dropbox Education enables researchers, colleagues, and students to use the tools they prefer. Bringing these tools together results in increased user satisfaction and deeper engagement across an institution's entire user community.

Gain direct access to Dropbox content from Blackboard Learn

Streamline collaboration workflows by enabling users to manage their content in one central place. Users also can authenticate Dropbox from the Blackboard Learn interface.

Upload assignments from Dropbox Education directly into Blackboard Learn

From the Blackboard Learn interface, learners can upload an assignment directly from Dropbox Education

Store, update, and add permissions to files

Manage permissions on files of any size or type from any device, both on or offline

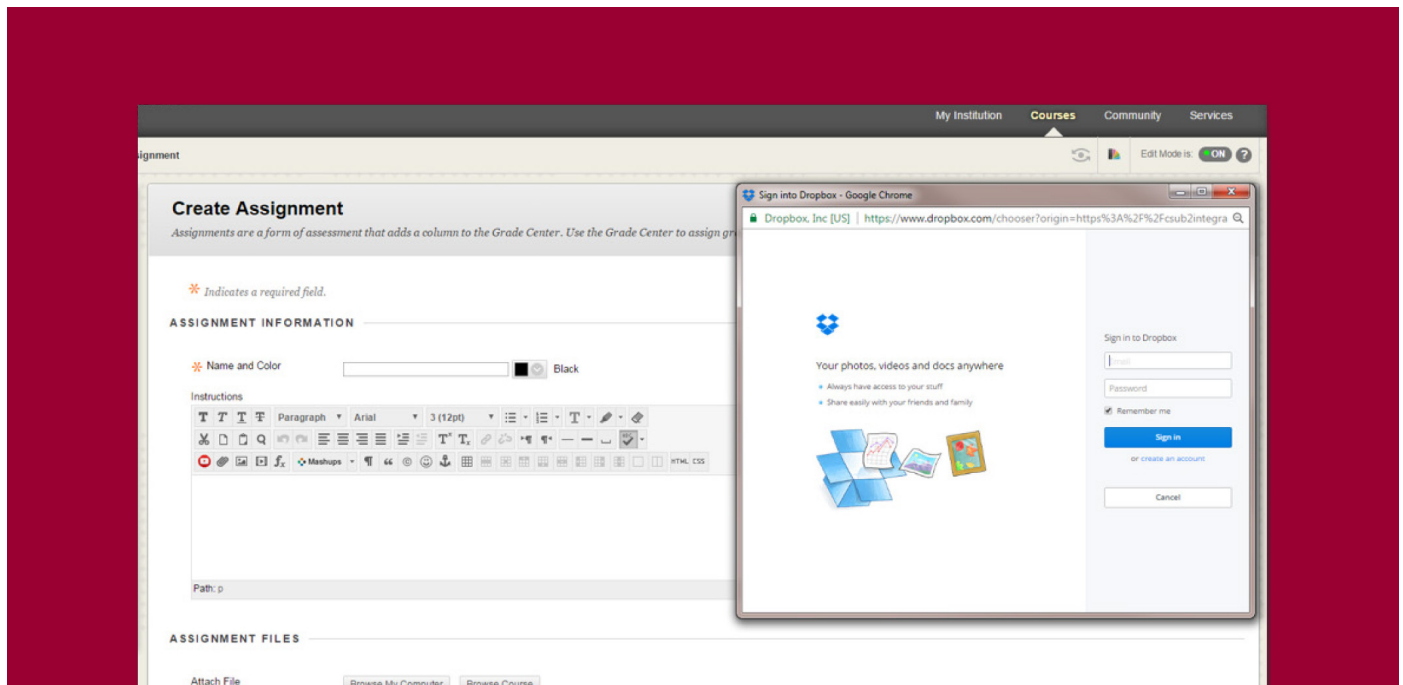

Sync across all devices

When users modify their Dropbox files, Blackboard Learn will automatically reference the most recent version of the file

“Blackboard is excited to partner with Dropbox to deliver a tailored experience which will enable students and instructors to use our strong learning management technologies alongside their collaboration platform of choice.”

Dropbox Business + Blackboard

Dropbox

Dropbox Education enables faculty and students to connect and collaborate anywhere, on any device

- Streamlined collaboration workflows to increase productivity of faculty, staff, and students
- Advanced security, visibility and controls for IT admins
- Best-in-class sync for sharing large files
- Enterprise-grade security features to manage data across classes, teams, and departments
- Powered by a secure architecture, including FERPA, HIPAA and COPPA certifications

Blackboard

Blackboard Learn is a scalable, reliable foundation for a world-class learning experience

- Simple content creation: Easily create content, incorporate existing material, or import content from another course
- Discussions: We've made discussions simple so it's easy for educators to foster anywhere, anytime social learning
- Assessments: From tests and quizzes to surveys and polls, choose among many options and build your own online assessments. Reuse questions or create new ones on the fly.
- Embedded learning analytics: Blackboard's predictive learning analytics are embedded into core workflows for both educators and students in order to drive student success
- Mobile learning experience: Blackboard is creating a new way to learn. A responsive design, combined with our native mobile apps, provides maximum flexibility for your on-the-go users.
