

Unified Identity for Dropbox for Business

CENTRIFY ALLIANCE

When employees share more, productivity skyrockets. Dropbox for Business gives users secure access to files across all their devices, anywhere, anytime. With tools for fast and secure file sharing between internal and external partners, Dropbox for Business improves productivity and enables organization-wide collaboration. Powerful control and visibility features help administrators manage devices and keep company data secure.

Centrify Identity Service improves end-user productivity and secures access to cloud, mobile, and on-premises apps via single sign-on, user provisioning and multi-factor authentication. Centrify can automatically provision your users in to Dropbox for Business based on their role and group within Active Directory or LDAP, and can provision the Dropbox apps across all devices.

Centrify Identity Service + Dropbox

Directory Integration and Single Sign-on

Improves user experience and productivity while eliminating password reset calls — a top support cost. Leverage your existing Active Directory or LDAP infrastructure to provide access to cloud and on-premises apps.

Mobile Device Management & Security

Mobile Device Management with integrated multi-factor authentication including wearable device notifications, for all applications that require additional scrutiny.

Centrify Mac Management

Join Macs to Active Directory and manage them with Group Policy. Make Mac mainstream with full IT control. Easily deploy and manage Dropbox with Centrify for Mac.

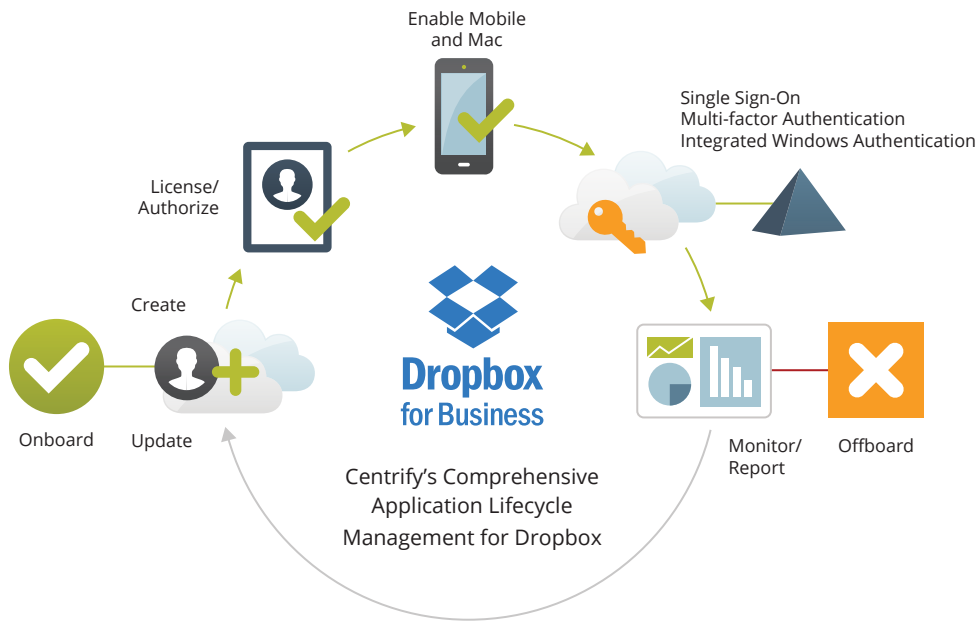

On-Premises App Gateway

Secure, one-click, remote access to internal web apps like SharePoint, and SAP, without the hassles and risk of VPN. Productivity for employees, partners and suppliers. Visibility and policy-based control for IT.

5000+ Customers, including 24 of Fortune 50,
rely on Centrify
