

Automate business processes with Dropbox through an intuitive, browser-based, drag and-drop workflow designer

Nintex Workflow Cloud helps streamline document management lifecycle processes within Dropbox Business with increased efficiency, consistency, and predictability. Leverage a wealth of native workflow actions to support core processes across a range of industries and business scenarios, including proposal and contract generation, document approvals, field service automation, service provisioning, compliance notifications, and more. Through Nintex's pre-built connectors, you can integrate your Dropbox Business account with the business applications, cloud services, and content repositories your teams use every day.

Leverage prebuilt connectors that integrate with Dropbox Business

Automate document lifecycle processes—such as reviews and approvals—in Dropbox Business and extend those processes to workflows across your CRM, ERP, and help desk solutions

Design and build workflow triggers

With a browser-based drag and drop design canvas, you can create workflow triggers that indicate when content is uploaded, downloaded, or deleted from your Dropbox account

Gain greater visibility and insights

Track and monitor how well your workflow processes are operating across Dropbox and other connected applications

“The Dropbox integration with Nintex Workflow Cloud enables organizations to guide complex user-driven workflows, drive user adoption of collaboration tools for better business efficiency, and optimize the work experience for maximum productivity.”

Ryan Duguid
VP of Product, Nintex

+

With Dropbox, it's easy to create seamless workflows that enable team collaboration

- Version history and deletion recovery, allowing users to preview and restore previous versions for up to 120 days
- Enhanced workflows with previews across devices
- Annotations to collaborate on any file type
- Simple, convenient, and secure external sharing with shared links
- Dropbox Paper, a flexible workspace that brings people and ideas together

Nintex Workflow Cloud is a state-of-the-art cloud workflow capability that lets you easily extend and connect your applications, content, and systems of record

- Automated workflows, reducing the time spent on specific business processes from years to a few days
- Drag-and-drop modules that connect and extend legacy systems to modern SaaS applications, building human-centric workflows
- Optimized data delivery, offering the right content at the right time
- Visibility into business process intelligence so you can measure the impact of your automated workflows on your business
