

Easily upload plans and save As-Builts and Snapshots directly from Dropbox to PlanGrid

Together with Dropbox, PlanGrid makes it easy to seamlessly access RFI responses, product data, and installation instructions from any device. Access your Dropbox files wherever you go to ensure your team stays on the same page.

Build and collaborate from anywhere with real-time access to construction information generated from PlanGrid in Dropbox

Office personnel can easily distribute the current set of drawings, plans and more to teams in the field by importing plans directly from Dropbox to PlanGrid

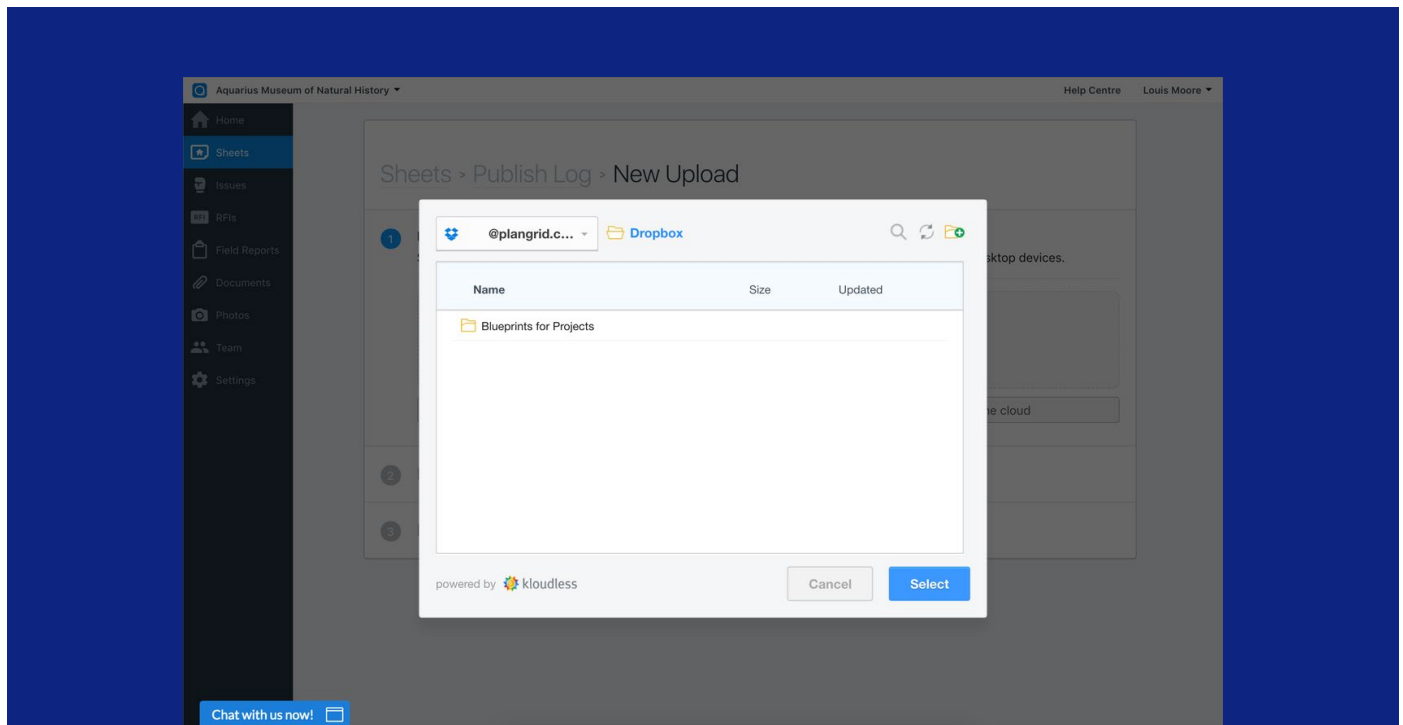

Teams in the office or the field can upload and archive As-Builts (PDFs) and Snapshots (field photos) directly to Dropbox

Engage and collaborate with contractors and suppliers in the field, on desktop and mobile via the Dropbox network

“Construction projects are becoming increasingly complex and require sophisticated coordination between many different organizations. Through our experience of working on over a million projects around the world, we know seamless collaboration with everyone on a jobsite is the fastest way to increase productivity both in the field and the office. Together with Dropbox, we’re empowering construction teams to do more with less.”

James Cook
Head of Strategic Alliances and Partnerships at PlanGrid

Dropbox

Dropbox Business is a central hub that enables project managers and general contractors to coordinate their teams and job sites to reduce overhead

- Simplify project management and remove silos. Bring together work from internal teams, contractors, architects and clients in one place, and easily search and manage files from construction sites.
- Minimize delays. Dropbox syncs 4 times faster than competitors. Get instant access to renderings, blueprints and videos without VPN or taking up space on your device.
- Work productively. Collaborate on any file type, from large CAD or BIM files to Excel spreadsheets with advanced previews—whether you're at the office or on-site on a mobile device.
- Securely control and manage your jobs with extensive security and administration features that scale with your team

PlanGrid

PlanGrid has helped more than 500,000 project teams around the world build more productively

- Build and collaborate from anywhere with real-time access to blueprints, markups, punch lists, RFIs, and more to keep the field, trailer, and office on the same page
- Collect and manage project information throughout the project's construction and operations lifecycle
- Streamline document management and control, providing collaborators with easy access to all project information from any device
