

Your content and conversations, together

Dropbox and Slack bring your content and conversations together seamlessly so teams can easily collaborate.

Today's teams rely on an array of tools to get work done, often jumping back and forth between them. With the Dropbox and Slack integration, your content and conversations stay together seamlessly as you move between tools—so your teams and the people they work with can stay on the same page and find information easily.

Work smarter from anywhere

Start a Slack conversation within Dropbox to discuss changes or updates to shared content, keeping your conversations and content in the same place.

Keep your team in the loop

Send files to individuals or Slack channels directly from Dropbox to easily share your work.

Reduce the need to move between platforms

Easily share Dropbox files with the Slack “+” button, or directly from within Dropbox.

Stay in sync with everyone from anywhere

View Slack activity that occurred around your files from all your devices to stay informed of the latest updates, even while on the go.

Collaborate on Dropbox Paper docs in Slack

Collaborate on content with the ability to post, preview, create, and search for Paper docs right from Slack.
