

# Access comprehensive data collection and field extraction for Dropbox through a set of Splunk dashboards that provide sharing, device, application, and security activity

Collect, extract, and analyze key operational and security data from your Dropbox deployment

Build dashboards, reports, and alerts to visualize and proactively respond to issues with your Dropbox environment

Ensure the right documents are shared by the right people, for the right people, and utilized by the correct applications

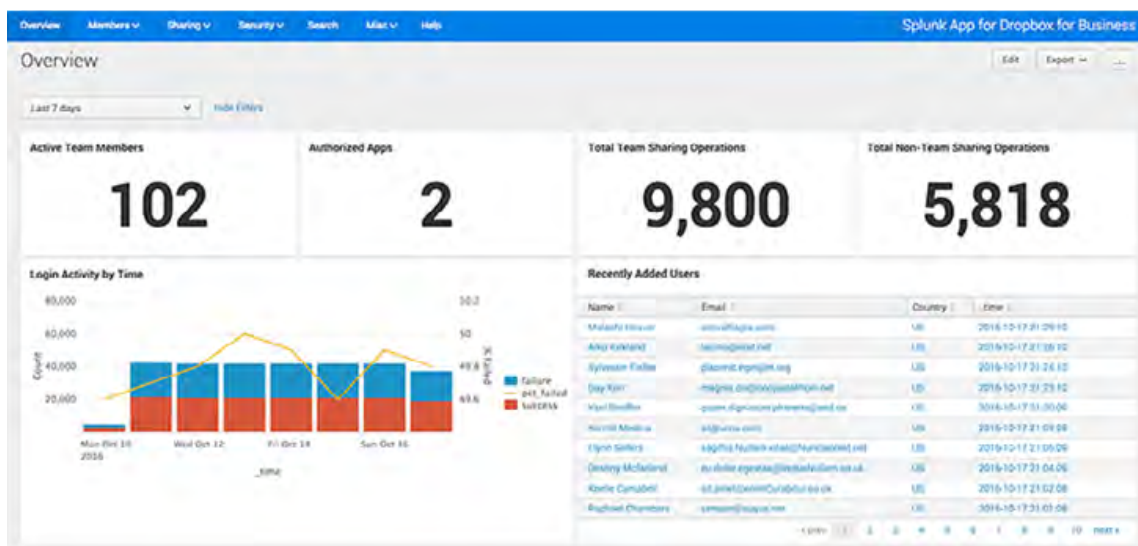

Gain visibility into where files are shared inside and outside the enterprise

Correlate security-relevant Dropbox data with other security-relevant data with Splunk Enterprise Security

Audit team administrator actions

For more information, contact your Dropbox sales representative at [ecosystem-partnerships@dropbox.com](mailto:ecosystem-partnerships@dropbox.com) or Splunk sales representative.
