Dropbox Business + ✓ Symantec

Safeguard your organization against the risk of data loss and threats targeting cloud accounts

With Symantec DLP Cloud and Symantec CloudSOC, you can extend enterprise-level data loss prevention (DLP) everywhere—both on–premises and to the cloud for your Dropbox deployment.

Detect threats and mitigate risky user activity in Dropbox accounts
Using advanced data science and machine learning, analyze user activity and identify risks to sensitive corporate data and enable automated policy controls

Protect data exposure and compliance risks
Protect your data in Dropbox with the same policies and workflows your company uses across your organization with Symantec DLP capabilities

Empower employees to use the tools they prefer
Offer your employees secure access to Dropbox while protecting your organization with automated policies and encryption to prevent accidental or malicious over-sharing of data

Perform targeted, post-incident analysis of user activity
Quickly assess activity that may impact your Dropbox accounts with detailed transactional information, powerful visualizations, and extensive log filtering capabilities
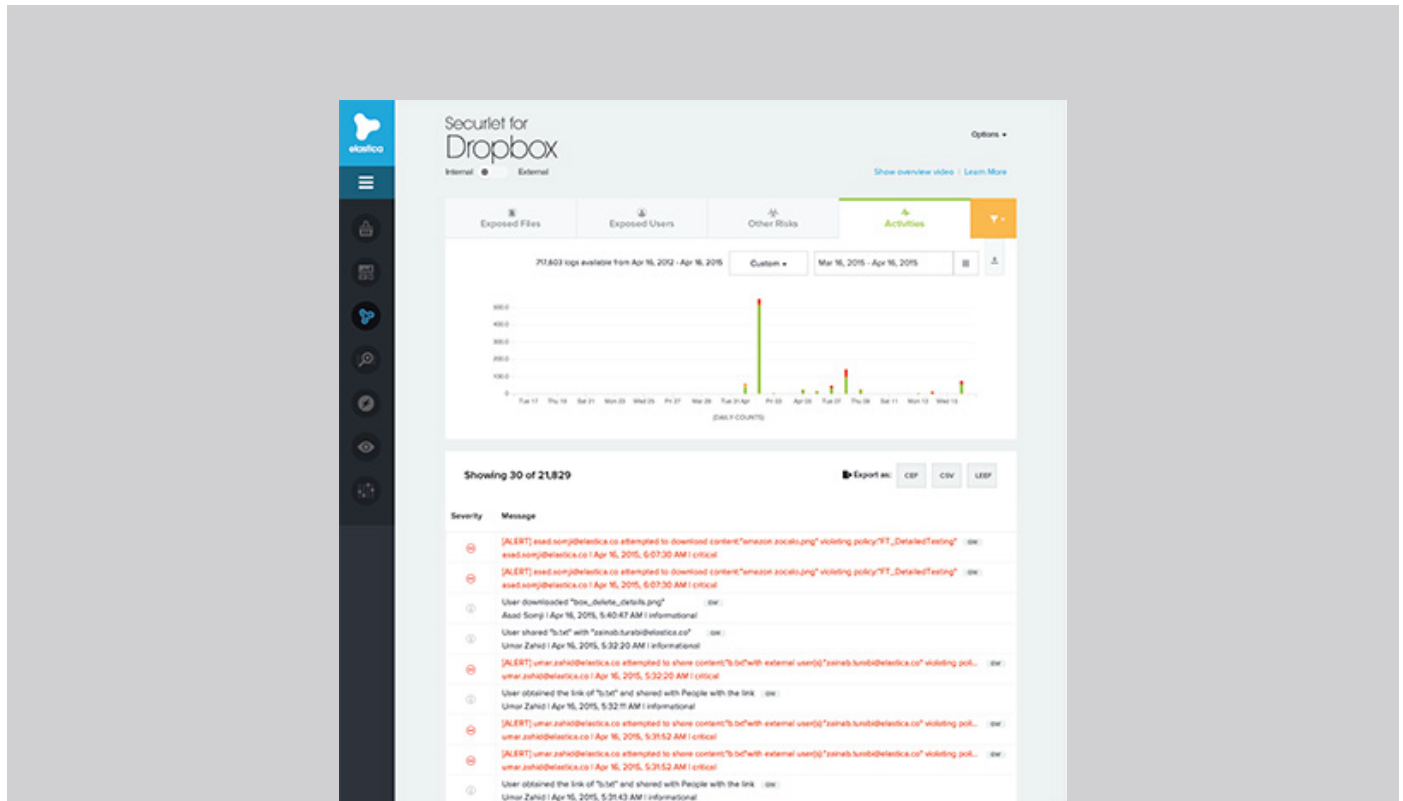

Network Control interoperability
Enable organizations to limit the use of unauthorized personal Dropbox accounts on corporate networks, while allowing access to company-managed accounts using Blue Coat Web Gateway or Symantec CASB Proxy and Dropbox Network Control

"As part of our joint efforts with Dropbox, we can provide customers peace of mind that their stored data in the cloud is safe from accidental loss or theft. And, we're able to offer CIOs more visibility and control across their corporate networks and enhance the overall collaboration and security experience."

Peter Doggart
VP of Business Development, Symantec

Dropbox Business   +   ✔ Symantec.

Dropbox

Symantec.

Coupled with a DLP/CASB solution, Dropbox enables you to protect your files when syncing and sharing:

- Inspect file content in managed Dropbox accounts

- Set and enforce policies on sensitive data in Dropbox

- Monitor sharing activity and correct unauthorized sharing behaviors

- Meet compliance and regulatory requirements

- Take additional action based on flagged content (automated alerts, quarantine, modify collaborators, encrypt)

- Detect anomalous & suspicious user behavior

The Symantec cloud security solution combines best-in-class DLP and CASB technologies that enables visibility and control to cloud apps:

- Extend data loss prevention (DLP) everywhere—both on–premises and to the cloud with Symantec DLP Cloud and Symantec CloudSOC

- Adopt cloud apps while safeguarding your organization against threats targeting cloud accounts and gaining direct visibility and control over the use of cloud apps
