Dropbox Business

Turn your company's next big idea into reality

Your team does its best work when everyone is in sync. The challenge is people are in different places on different devices at different times. Dropbox Business makes it easier for technology teams to turn great ideas into products people love.

Make work flow faster

Get in flow
Get design, product, and engineering teams in sync on one tool.

Build it your way
Create custom workflows using the Dropbox for Business API.

Use the tools you love
Plug into your favorite development, project management, and communication tools, including:

- Jira Software
- Microsoft
- Salesforce
- Slack
- Trello

Keep the flow going
Team up with supply chain vendors, consultants, and manufacturers to ship faster.

Work anywhere, anytime

Any device
Use Dropbox on any device and all of the most popular operating systems, so you can work wherever and whenever you want.

Speed matters
Work and get approvals faster with on-the-go previews, including:

- Mockups
- Product demo videos
- Illustrations and more

Size doesn't
Skip the storage headaches when uploading and sharing big files:

- Designs
- Programming
- Code

Work securely

Keep your work safe
Protect creative content and IP with enterprise-grade security features, including:

- Detailed audit logs
- Single-sign-on (SSO) capability
- Admin Console to monitor sharing

> **"When you're constantly trying to operate as fast as possible, you can't afford to track down the latest version of a video or send extremely large files over email. With Dropbox, our employees can access and share all their work from one place, even when they're not physically in the office."**

Joe Ziemer, Head of Communications and Partnerships, Betterment

Dropbox Business helps teams work better, so you can put inspired products into your customers' hands faster. To learn more about how Dropbox Business helps technology companies, visit dropbox.com/business/solutions/technology or talk to our team.
